**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windy on the summits where warm clothing and windbreakers will be required. There will also be a sunburn risk and sun cream should be used where possible.

Forecast for Monday 18 Apr 2022

Weather: Early cloud and patchy rain quickly clearing to a cool, dry and bright day. Moderate southwesterly winds.

Maximum wind: Southwesterly mean 15 mph gusting 25 mph.

Chance of cloud-free hill tops above 800m: 30% early hours quickly improving to 90%.

Low cloud and visibility: Rain and low cloud above 400 m through the early hours quickly clearing in the morning. Thereafter, good visibility with cloud bases mainly above summits.

Temperature: **Valleys:** Plus 8 Celsius rising to plus 11 Celsius.
At 800m: Temperature ranging between plus 1 Celsius and plus 4 Celsius.
Freezing level: Above summits falling to 900 m.

Mountain Weather Forecast

Ground Conditions Supplement

Date: Saturday 16 April. Location: Helvellyn summit at 10:37. Temperature: plus 6.2C. Maximum wind speed 26.2mph. Wind chill: plus 0.9C. Average wind speed: 19.2mph. Full report: A cloudy morning with moderate winds over high ground eventually gave way to a fine afternoon with cloud lifting and clearing most of the higher tops by mid-afternoon. The fells are by and large snow-free up to and including the highest tops, with the exception of a few patches of snow in sheltered spots and hollows and on steep north and east-facing slopes, particularly on Helvellyn. Striding and Swirral Edges were in good condition today with dry rock and both can be climbed and descended without setting foot on snow. Despite the milder temperatures, the summit windchill (feels like) temperature is still frequently around zero and into minus figures. Therefore warm and waterproof clothing, including hat & gloves and a reliable way of navigating in poor visibility are all essential. The Fell Top Assessing service continues until Bank Holiday Monday.
